NONLINEAR DIFFUSION EQUATIONS AND THEIR EQUILIBRIUM STATES II: PROCEEDINGS OF A MICROPROGRAM HELD AUGUST 25-SEPTEMBER 12, 1986 (PAPERBACK)

In recent years considerable interest has been focused on nonlinear diffusion problems, the archetypical equation for these being \( \frac{\partial u}{\partial t} = \Delta u + f(u) \). Here \( \Delta \) denotes the n-dimensional Laplacian, the solution \( u = u(x, t) \) is defined over some space-time domain of the form \( \mathbb{R}^n \times [0, T] \), and \( f(u) \) is a given real function whose form is determined...

Reviews

Very helpful to all category of folks. It is actually rally exciting through studying time. I am easily will get a delight of looking at a created ebook.
-- Prof. Isaiah Haber

These kinds of publication is everything and got me to looking ahead of time and much more. it absolutely was written extremely completely and valuable. Your way of life period is going to be enhance when you full looking over this ebook.
-- Dr. Lessie Murphy IV
